

Azimuth Contracting

For over 28 years the Azimuth Group has been delivering quality IT, Business, Finance, Corporate and Administrative capability, primarily to Government clients in Wellington and Auckland.

We pride ourselves on our professionalism, integrity, and our focus on quality and experience. We work for you, not the candidate, which means we only put the right people forward.

We understand both the business, and its needs (the government structure and way of working). We recognise the importance of the softer side and place importance on professionalism, interpersonal and technical skills.

Our process is different than most. The person who gets to understand your business, its culture and your specific need, is the same person that knows, interviews, and selects the right person for the role.

We are not mechanistic, we apply a personal touch. We are hands on and stay involved throughout the term of the assignment.

All our services are delivered using a mature framework that ensures we provide a consistent level of high quality service. We are committed to keeping in touch with you throughout the assignment to ensure our people continue to fulfil the requirements of the role.
